

PARATRANSIT

PARATRANSIT

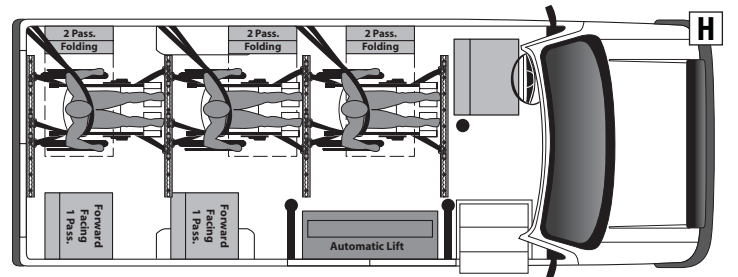

Our Paratransit vehicles have been a workhorse of commercial transportation needs for almost 40 years. Agencies and industries across the country rely on our products day after day. They've placed their trust in the Braun name, which goes hand-in-hand with dependability and reliability in the mobility industry.

We offer a variety of floor plan options allowing you to mix and match seating to suit your specific needs. Up to four wheelchair securement positions can be arranged, including the appropriate belt systems and locks. And of course, the durable Braun wheelchair lift guarantees dependable access for all.

When our commercial customers purchase a Braun paratransit conversion, they're also purchasing a passenger safety guarantee. Our Paratransit line complies fully with the Federal Motor Vehicle Safety Standards, Americans with Disabilities Act requirements, and QVM standards. Reliability, safety and versatility - all part of the Braun commitment to our customers!
