

ENTERVAN™

For over a decade, the Braun Entervan has meant a new level of personal freedom for thousands of individuals. Freedom to work, freedom to play — freedom to go anywhere they desire. Now it's wanting to do the same for you. We invite you to explore the unique features and discover how the Entervan can change your life.

*providing access
to the world®*

The Entervan's accessible features are designed to blend seamlessly into the original design of the Chrysler or GM minivan. In fact, you'll find the Entervan to be virtually indistinguishable from other minivans on the road. But, as you'll see, the touch of a button quickly reveals what makes the Entervan special.

The Entervan features a spacious lowered floor area, designed to give wheelchair users easy access to the interior and to ride at a comfortable height.

The Entervan is built on a state-of-the-art assembly line in our Winamac, IN plant. The conversion process has been steadily refined and perfected for over a decade, resulting in a smooth, efficient system modeled after traditional vehicle production lines.
