

## Ford Transit Connect ADA Mobility Van

The Ford Transit Connect is the latest rear-entry consumer wheelchair van offering from Nor-Cal Vans. Economically priced, the Transit Connect provides a whole new option for wheelchair van passengers and caregivers. Its excellent maneuverability and ample interior space may be just what you're looking for in today's accessible van market. The Transit Connect is a front-wheel drive vehicle and comes in XLT trim levels. It has sliding side doors in the rear like a minivan and two rear folding doors similar to a commercial van. The power train comes with a 136 horsepower 2.0 L, 4cylinder engine with a 4-speed automatic transmission.

### Transit Connect XLT Features

- Power Mirrors, Windows, Locks

- Manual folding ramp
- Transit flooring
- Retractable w/c securement system
- 2 tinted side rear-panel windows

Transit Connect ADA Mobility Vans were developed by commercial wheelchair van providers in The Mobility Alliance. The Transit Connect offers a new ADA Compliant rear entry option for taxi companies, clinics, nursing homes and any other business that transports wheelchair passengers.

Nor-Cal Vans is proud to announce one of its newest offerings, the Ford Transit Connect ADA Mobility Van. Developed by commercial wheelchair van providers in The Mobility Alliance, in conjunction with Ford Motor Company, the Transit Connect offers a new ADA Compliant rear entry option to the market that is economical and practical.

With the rear tumble seat folded forward, the vehicle's design provides a wheelchair area of 31" wide x 50" in length. With the rear seat in its upright position, three full-sized adults can be transported in the rear seating area, along with the driver and another passenger in the front. This new design combines the affordability of a rear entry transport van for handicap passengers with non-wheelchair passenger capabilities, transitioning from one use to the other in less than a minute.

The Transit Connect has rear-folding bench seats for able-bodied passengers that fold forward to make room for wheelchair passengers. They easily fold back down and lock into place in less than a minute.
